[] Comments

- 1) Most of the shipments directed via Frankfurt/Oder and Schneina were deliveries by East German hydrogenation plants to the U.S.S.R. The shipments dispatched to Stettin will be transloaded there to ship.
- 2) The benzol shipments to Krumpa and Herseburg are believed to have been required by hydrogenation plants to increase the octane rating of fuel produced by them.
- 3) Shipments through Forst are exclusively dispatched to Poland.
- 4) The Bad Schandau and Bad Brambach border stations handle the crude oil shipments from Zistersdorf, Austria, to Eastern Germany.
- 5) Slawiecice is on the Haydebreck-Gleiwitz railroad line in Upper Silesia.
- 6) Mersol is a type of sodium paraffin found in sulfonate detergents.
